Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking entity.

¹ A '*' following a place name indicates that the place is coextensive with a MCD; a '*' following an incorporated place name indicates that the place is also a MCD; the place name is repeated in the legend.

² The term 'tribal census tract' refers to a geographic area within a subject entity, nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on the boundaries of the tribal entity. If a tribal census tract crosses state or county boundaries, the same tribal census tract number may be assigned to both sides of the boundary and, if so, constitutes a single tribal census tract entity.

³ A '*' following a block number indicates that the block number is repeated elsewhere in the block.
